Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 November 2006.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

Claims 6-7, 9 and 12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 11/9/06.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5, 8, 10-11 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite because the specification and drawings show only one pouch.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 8 and 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ho 5,806,726 in view of Savage 4,375,864.

Art Unit: 3754

Ho shows a hydration system comprising a pouch 10, tube 16 and user actuable valve 181. Ho lacks a check valve. Savage shows a check valve 58 that is opened when the tube 66 is coupled to a pouch 14 and closed when the tube is decoupled from the pouch to prevent air from entering the pouch (see abstract). It would have been obvious to one of ordinary skill in the art to have modified Ho with a check valve as taught by Savage to prevent air from entering the pouch.

Claim 2 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ho in view of Savage as applied to claim 1 above, and further in view of Snyder 4,981,022.

The Ho/Savage apparatus lacks the pouch having a thermal medium section. Snyder shows a container having a thermal medium section to maintain the temperature of the contained material. It would have been obvious to one of ordinary skill in the art to have modified the Ho/Savage apparatus with the pouch having a thermal medium as taught by Snyder to maintain the temperature of the contained material.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ho in view of Savage as applied to claim 1 above, and further in view of Meyer et al.

The Ho / Savage apparatus lacks a coupling having a latch mechanism. Meyer et al shows a coupling having a latch 26 to to retain the male and female member in a coupled state (column 2, lines 29-31). It would have been obvious to one of ordinary skill in the art to have modified the Ho/Ash et al/ Savage apparatus with the coupling having a latch mechanism as taught by Meyer et al to retain the male and female member in a coupled state.

Art Unit: 3754

Allowable Subject Matter

Claims 10-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
